

# Fides Connect.

## Integrate all internal systems and financial partners worldwide.

Fides is the world leader in **multibank connectivity, payments and transaction communications**. A market leader for more than a century. We connect thousands of companies with more than 13,000 banks and payment providers, and enable **cash and liquidity management** for treasury and finance teams around the globe. Our services are accessible through our **Multibanking Suite** or via **seamless integration with third-party ERP and TMS systems**.

## A Single Solution.

Fides' cloud-based connectivity links your company with global financial partners and internal systems, providing visibility into cash and liquidity positions and ensuring payment simplicity. Our seamless processing and enhanced security ensure a secure and efficient financial ecosystem for your business.

### FIGES CONNECTIVITY BENEFITS:

- **Seamless Connectivity to ERP and TMS Systems.**

Easily connect your financial systems, such as TMS (treasury management system), ERP or other business systems, through our end-to-end processing services.

- **Global Reach with a Unique Hybrid Model.**

Fides' unique hybrid model allows integration with different methods like SWIFT, EBICS, H2H, APIs and more. Our dual-BIC service option ensures seamless connectivity with banks worldwide, closing gaps in SCORE readiness.

- **Continuity with Disaster Recovery Capabilities.**

Fides ensures business continuity with embedded disaster recovery capabilities in every solution we offer. Count on us as a single source for all your connectivity and disaster recovery needs.

- **Regulatory Compliance Support.**

Fides provides a comprehensive set of tools to address global payments and financial data compliance, sanction screening, fraud prevention and overall security. This includes daily updates on OFAC or any other sanction lists to ensure compliance of all transactions, as well as a complete set of security protocols to prevent fraud.

## The One-Stop-Shop for Visibility and Payment Simplicity.

Fides offers a unique, proven end-to-end solution with managed connectivity. This allows us to connect your banks and then continuously monitor them along with any new connections. With Fides, there is no need for additional systems or other providers. You get everything from a single source.

Choose Fides for seamless connectivity, disaster recovery, global reach and regulatory compliance support.
